

Product:

ANTI-OX
DeRuster / DeGreaser

Product Code:

ANTIOX1L, ANTIOX5L, ANTIOX20L, ANTIOX 200L

Introduction:

Oxytech's ANTI-OX is a versatile phosphoric acid based deruster, degreaser and phosphator all in one. ANTI-OX is designed to attack rust while removing oils and contaminants from the metal surface. ANTI-OX is also suitable as a bath solution for soaking rusted parts and bolts.

Applications:

Automotive fabrication & restoration, pre-paint treatment, rust removal

Pack Sizes:

1 Litre, 5 Litre, 20 Litre & 200 Litre

Application Schedule:

HEAVY RUST: Apply undiluted and scrub with a wire brush or wire wheel. Rinse thoroughly with water. Repeat if necessary.

MEDIUM & LIGHT RUST: Dilute 1:10 with water and apply with brush or saturated rag. Allow 10-15 minutes for reaction and remove excess ANTI-OX with clean water damp rags. ANTI-OX can be applied undiluted for faster treatment on raw steel only. Remove excess ANTI-OX with a clean water damp rag.

UNRUSTED/METAL CONDITIONING: Dilute ANTI-OX 1:25 with water and apply by brush or saturated rag. Allow to dry and remove white powder with a clean water damp rag.

Once metal has been treated with ANTI-OX, a light coating of EASY PHOS can be applied to maintain the rust free surface.

Coverage:

1 Litre of EASY PHOS will treat up to 30m² of surface (pressurised, air feed spray gun). Heavier application will reduce this considerably.

Health & Safety:

Contains PHOSPHORIC ACID
Wear gloves and goggles. If on skin, wash immediately.
Care should be taken when applying EASY PHOS. Apply in a well ventilated area.
Please read MSDS for further information.
